Cleanroom Membrane Keyboard

Highlights

Cleanroom membrane keyboard designed for use in sterile environments as cleanrooms, life science, pharmacies and laboratories. Blue Lines hygienic keyboards are among the most reliable solutions in the market. Extremely cleaning-friendly and specially designed for harsh environments and comes with flexible design. Robust against extensive use of water and cleaning agents.
The construction is based on materials ensuring long durability and reliability, which save time and money. Modernise and optimise the workflow as well as safety and comfort.
